

Why Hire DMN Communications?

Your documentation is a part of your corporate currency. Client documentation shouldn't be just an afterthought. User manuals, marketing collateral, and technical support documentation are your face to current and prospective customers. The quality of your technical communications is vital to the success of your products and services and contributes to the integrity of your brand.

Unfortunately, even some of the largest and most well respected companies periodically lack the resources or expertise in-house to fulfill a project requirement. Revenue opportunity and aggressive project deadlines require a highly skilled team of technical communication professionals to help you complete a project.

That's where DMN Communications comes in. We're a highly experienced team of skilled technical communications professionals who can bring out the best in your technical documentation.

We put IT in writing.™

Eight Reasons to Hire DMN

Why [hire](#) DMN Communications? Here are eight reasons:

Top-Notch Experience

DMN Communications has over 20 years of experience developing high-quality technical documentation and business content for the world's most successful companies including PeopleSoft, Oracle, Nokia, Cisco Systems, and ADP. We continue to attract clients who require innovative marketing collateral in the form of white papers, case studies, and social media.

We're experts at authoring, refactoring, and streamlining technical documentation across a broad range of businesses including enterprise software, telecommunications, and financial services. We get the job done using industry standard tools and technologies. If a challenging project calls for innovative thinking, we welcome the opportunity try something new.

Documents That You Can Use

Far too often, technical documentation is difficult to understand, contains redundant information, and are dull. DMN can make your documents interesting and lively, while at the same time informative and usable.

Creating highly usable documentation starts with putting the user first. We're passionate about developing enjoyable user experiences that contribute to the strength of your brand. Whether it's an intelligent

online help system that incorporates the latest social media innovations, or a simplified printed deliverable, we create content that allows users to excel.

Reliability

We take pride in the fact that we've never missed a deadline. Ever. We get the job done on time. It's not only our reputation, but a guiding principle in everything we do. DMN Communications is a trusted partner in your successes.

Speed, with Quality

We can quickly complete any writing task, seamlessly moving from first draft to finished product. Using our **Rapid Authoring** methodology, DMN Communications can help you meet those aggressive deadlines by moving from content planning to final draft in an efficient manner.

We never sacrifice the quality and accuracy of your project, regardless of your project deadline.

Purposeful Content

Not every document is suitable for every reader. We understand that. Instead of creating a one-size-fits all document, we develop content that is suitable for a particular audience and purpose.

Creating purposeful content ensures that your clients – whether external or internal – get information that is specifically designed with their requirements in mind.

The DMN Difference

We don't just parachute in for a project and then leave. DMN Communications prides itself on making a project its own. We take ownership of what we're working on. In the end, we're responsible for the quality of the work.

Because our reputation is on the line with every project, *just good enough* isn't good enough for us. We strive to make your documents and writing projects the best that they can be. We are passionate about our work, and committed to the continued success of our clients.

Simplicity

Documents can easily become over complex and cumbersome. We believe in simplicity. Less is more. Let us develop content and solutions that are efficient enough to get the job done without wasting valuable time and resources maintaining a myriad of documents.

We Listen to You

We work for *you*. The direction of the documents is yours to set. While we may try to convince you of a particular plan of action, the final decision is yours. And we respect that decision.

Getting Started with DMN

Working with DMN Communications is easy:

Get in Touch

Phone, [email](#), or instant message us. We're happy to discuss how DMN Communications can contribute to your successful project. There's no obligation to [hire us](#), although we'll try hard to convince you that DMN Communications is your best choice.

Request a Proposal

We can have a comprehensive proposal to you within five working days. If your needs are urgent, we can expedite the proposal to meet your requirements. We are always happy to offer a risk-free trial of our services without obligation.

Dive In

Once the proposal is approved and the contract is signed, we'll get right to work on your project. We'll supply you with a detailed project plan, give you frequent status updates, and hand deliverables off as needed or requested. DMN Communications is committed to delivering the documentation you need to make your project a success.
